

*NuTech would like to introduce...*

## **Truly Endless Felt Belts**

Truly endless Wool Felt belts are consistently chosen for croissant and long bread production. Commonly used on equipment made by OEM's like: Ideal, Loks, CIM, Rondo, Fortuna, Bertrand, and Comas.

Our Truly Endless Felt belts can be produced in almost any width, length or thickness. Most common thickness runs between 2-4mm.

All belts are prepared and stretched while running and this gives them the ability to perform without any problem on the moulding machine. As the belts are very compact, they enable long working time without problems. The surface of the belts for bakeries is normally singed, but we can also supply the belts that are not singed on the surface according to the customer needs.

If you're interested in receiving a no obligation quote please fill in the form below and fax it to our office at: (905) 876-9313.
